

## Do you feel unhappy?

I am a qualified numerologist and with my knowledge I can help you improve your life and achieve all your dreams. Numerology is the study of the meaning and influence of numbers. It is a secret science mankind has studied since ancient times.

If your job is not satisfactory we can help you move to a different field, we know this is a very important decision and therefore we offer you our trascendental field extensions. If you think this might be too drastic a change we can offer you a perfect field or extensions of any given degree to achieve success and leave irrational fears behind. All our field extensions comply with the highest quality standards.

Do you pay attention to the smallest details and yet the global result of your efforts is not satisfactory? This might be the result of a failure in your Hasse principle. The way in which everywhere local solutions fail to become a global solution is measured by the Shafarvich-Tate group: a group calculated with the most advanced cohomological methods; knowing your Shafarevich-Tate group will help you understand where your local construccions fail, improving your chances of achieving global success. Under some standard conjectures I can calculate your Shafarevich-Tate group and show you the way to a better, happier life. We can also help you get rid of Brauer obstructions and exorcise demonic posesions with our refined  $p$ -adic analisis methods.

Do you feel life just goes around in circles and everytyhing changes to stay the same? The problem here is that you are not familiarized with your personal monodromy. When a group (of people for example) acts on your life, this has a natural action in your fundamental group (family, work, health), understanding this transformations guides us when taking decisions and helps us find stabilizers that will improve our quality of life. Any person knowing his own monodromy group will find patterns that will help him to decide the which is the group of decisions better suited to his necessities. We catter for all kinds of people, offering classic,  $l$ -adic,  $p$ -adic, local, global, geometric and arithmetic monodromy combos.
